Science Fair

Hello Parents and Supporters of IAH!

My science classes are super awesome! I enjoy teaching my students all about science. My students are intelligent, funny, and have a huge appetite for knowledge. This school year we have learned so much and we want to share what we have learned by inviting you to our 2015 IAH Science Fair on January 27th and January 28th! The science fair time frame is from 9-1. The students and I have been working diligently to ensure that the projects are interesting and informative. Please show your support by attending the 2015 IAH Science Fair! My students would really like to see your faces!

**Sincerely,
Ms. Steele**

Science meets Math with Character Education

What is Character Education?

Character Education is the building of student's character. Also, "Character Education" is a term to describe the teaching of children in a manner that will help them develop characteristics that will serve them well morally, enforce good manners, good behavior, non-bullying, great work ethic, compliance, and socially acceptable beings.

In the spirit of "Character Education", Mrs. League started a tradition in our classroom by writing a positive trait that students should exhibit. I saw how the word of the week had a huge impact on our students. Mrs. League and I (Ms. Steele) have partnered together to make sure that students reflect and model the word of the week.

The word of the week is TENACIOUS! Mrs. League, Mrs. Reynolds, and I encourage our students to be tenacious in everything that they do and never give up. The sky is the

Orion Space Launch

On December 15, 2014, the IAH Middle School went to the Huntsville Space and Rocket Center to view the launching of the Orion space shuttle. The space shuttle planned to lift off from Cape Canaveral Air Force Station in Florida. The Orion spacecraft was set to orbit Earth twice, reaching an altitude of approximately 3,600 miles above Earth before landing in the Pacific Ocean. No one was aboard Orion for this flight test, but the spacecraft was designed to allow astronauts to journey to destinations never before visited by humans, including an asteroid and Mars.

Islamic Wax Museum

The students of IAH recreated famous people in the Muslim community. The students told important facts and created important scenes in the famous people's lives.

IAH Student Council

Student Council has started off great! The new members have started a snack shop to raise money for the school and student council activities. Student Council sets up on Fridays during lunch. Please support your local student council!

**“We work for a cause “
not
for applause!”**
